Publishing, Subscription, and Advertising Offices: Pergamon Press Inc., 395 Saw Mill River Road, Elmsford, NY 10523, U.S.A., or Pergamon Press plc, Headington Hill Hall, Oxford OX3 0BW, England.

Published Twenty-four Per Annum (Four Volumes 1991)

annual subscription rates (1991)
Annual institutional subscription rate (1991) DM 3380.00.
Two-year institutional rate (1991/1992) DM 6422.00.
Personal subscription rate for those whose library subscribes at the regular rate is available from any Pergamon Press office.
Subscription rates for Japan include despatch by air and prices are available on application.
Prices are subject to change without notice.

Back issues of all previously published volumes, in both hard copy and on microform, are available direct from Pergamon Press offices.

Whilst every effort is made by the publishers and editorial board to see that no inaccurate or misleading data, opinion or statement appears in this journal, they wish to make it clear that the data and opinions appearing in the articles and advertisements herein are the sole responsibility of the contributor or advertiser concerned. Accordingly, the publishers, the editorial board and editors and their respective employees, officers and agents accept no responsibility or liability whatsoever for the consequences of any such inaccurate or misleading data, opinion or statement.

LIST OF CONTENTS

NUMBER 1

AI CIVIL-COMP 89

B. Topping and B. Kumar: Preface v
S. M. Rowlinson: Knowledge-based systems: potential in design and management 1
A. Oki and D. Lloyd Smith: Metaknowledge reasoning in civil engineering expert systems 7
A. S. Watson and S. H. Chan: A PROLOG-based object oriented engineering DBMS 11
D. T. Shaw: Knowledge-based regulation processing for site development 23
K. Kähkönen: A knowledge-based system approach to determine durations of site activities 31
A. Sirajuddin and M. J. Mawdesley: A knowledge-based system for recognition of work required for construction 37
K. D. Lemon and J. Christian: A micro-computer application for managing construction productivity 45
M. Alshawi and D. Jagger: An expert system to assist in generating and scheduling construction activities 53
D. Echeverry, C. W. Ibbs and S. Kim: A knowledge-based approach to support the generation of construction schedules 59
N. Riad, D. Arditi and J. Mohammadi: A conceptual model for claim management in construction: an AI approach 67
G. R. Miller: An object-oriented approach to structural analysis and design 75
R. Fruchter and J. Gluck: Adaptive connections of multitype structural descriptors in a TLS for structural analysis 83
R. Fruchter and J. Gluck: A model for parallel training and learning in dynamic structural response analysis 93
J. C. Miles and C. J. Moore: An expert system for the conceptual design of bridges 101
P. N. Payne: Structural design using intelligent objects 107
D. R. Thompson, T. Tomski, S. W. Ellacott and P. Kuczora: An expert system for the preliminary design of timber roofs 115
N. A. B. Yehia, A. A. L. Sabbah and A. M. Mosalla: A knowledge-based system for the design of reinforced concrete halls 127
H. Furuta, N. Shiraishi, M. Umano and K. Kawakami: Knowledge-based expert system for damage assessment based on fuzzy reasoning 137
K. Ahmad, A. Langdon and P. A. Frieze: An expert system for offshore structure inspection and maintenance 143
K. B. Dussom, T. Hadj-Hamou and R. M. Bakeer: QUAKE: an expert system for the selection of design earthquake accelerogram 161
A. P. Wislocki and S. P. Bentley: An expert system for landslide hazard and risk assessment 169
J. Oliphant and D. I. Blockley: Knowledge-based system: advisor on the selection of earth retaining structures 173
I. E. G. Davey-Wilson: Development of a PROLOG-based expert system for groundwater control 185
N. A. Tyler: The contribution of expert opinion to the design of high capacity bus priority systems 191
Software Survey Section I

NUMBER 2

NONLINEAR FINITE ELEMENT ANALYSIS AND ADINA

K. J. Bathe: Preface v

K. J. Bathe: Some remarks and references on recent developments in finite element analysis procedures 201
A. L. Eterovic and K. J. Bathe: On the treatment of inequality constraints arising from contact conditions in finite element analysis 203
C. Poirier and R. Tinawi: Finite element stress tensor fields interpolation and manipulation using 3D dual kriging 211
P. Weber, L. Groß, A. Knocke, P. Sternecker, B. Brandel and W. Schönauer: The finite element method on vector processors 223
A. Chowdhury and C. N. Kostem: Significance of mesh-fineness in accuracy of finite element analysis of hyperbolic cooling tower shells 237
J. W. Tedesco, B. T. Rosson and W. G. McDougal: Numerical simulation of dolos drop tests 243
J. A. Sherwood and M. J. Boyle: Investigation of the thermomechanical response of a titanium aluminide/silicon carbide composite using a unified state variable model in ADINA 257
T. P. J. Mikkola and H. Niemi: Quality assurance for fracture mechanical finite element analyses 271
J. R. Mays and L. H. Roehm: Hydrodynamic pressure in a dam–reservoir system 281
D. Carlton and N. Mistry: Thermo-elastic-creep analysis of maturing concrete 293
L. J. Malvar and M. C. Hironaka: Heat resistant concrete for airfield pavements: preliminary numerical study 303
J. W. Tedesco, C. A. Ross, P. B. McGill and B. P. O'Neil: Numerical analysis of high strain rate concrete direct tension tests 313
K. Hock and C. Langlie: Calculation of shafts in deposits with regard to imperfections, buckling and visco-elastic material properties 329
P. Reimers: Simulation of mixed mode fatigue crack growth 339
M. Ishikawa: Thermal stress analysis of a concrete dam 347
R. Houlston and J. E. Slater: Global and local modelling of naval panels subjected to shock loads 353
H. Grebner and A. Höfler: *J*-Integral evaluation from ADINA shell element results 365
J. M. Santiago and S. Bhattacharya: Sensitivity of plate response calculations to blast load definition 375
B. Steinauer and D. Tao: Improving the traffic safety on Bavarian highway through profiled marking with use of ADINA 393
F. Tabaddor and J. Padovan: Element nonlinearity effects on local and global stability 401
T. Ramadan and A. Ghobarah: Prediction of the ultimate capacity of wide flange link beams under cyclic loading 409
I. Babuška and L. Li: Hierarchic modeling of plates 419
C. Gantes, J. J. Connor and R. D. Logcher: Combining numerical analysis and engineering judgment to design deployable structures 431
L. H. Tan and K. J. Bathe: Studies of finite element procedures—the conjugate gradient and GMRES methods in ADINA and ADINA-F 441
C. Cobb, W. D. Rolph and D. Wilmarth: System architectures for support of nonlinear finite element analysis 451
T. P. Harrigan: Analysis of the fixation of total hip femoral components using ADINA 463
E. G. Thimmhardy: Nonlinear analysis of buckling behaviour of steel box girder components 469
C. P. Fritzen and S. Zhu: Updating of finite element models by means of measured information 475
V. Kumar, B. I. Schumacher and M. D. German: Effect of thermal and residual stresses on the *J*-integral elastic–plastic fracture analysis 487
K.-V. Kniffka: A note on the analysis of the Mauvoisin concrete arch dam subjected to earthquake input 503
D. F. Lozupone and F. Piccolo: The use of ADINA-F for large model fluid-flow analyses 511

NUMBER 3

N. Ganesan and **T. C. Ramesh**	521	Stress analysis of railroad wheels using a conical shell element
S. Maleki	527	Compound strip method for box girders and folded plates
E. Zolti	539	Radiation heat transfer procedure for two-dimensional finite element models
F. Aboul-ella	549	New iterative analysis of cable-stayed structures
C. W. S. To and **B. Wang**	555	An axisymmetric thin shell finite element for vibration analysis
H. Kebari and **A. C. Cassell**	569	Non-conforming modes stabilization of a nine-node stress-resultant degenerated shell element with drilling freedom
U. Icardi and **A. Manuello**	581	Some considerations regarding the edge stress problem of laminates by finite elements
G. E. Stavroulakis, P. D. Panagiotopoulos and **A. M. Al-Fahed**	599	On the rigid body displacements and rotations in unilateral contact problems and applications
Long-Yuan Li	615	Interaction of forced and parametrically excited vibrations
C. J. Younis and **D. E. Panayotounakos**	619	Linear buckling analysis of a column–footing system resting on elastic soil
S. R. Raichman and **L. A. Godoy**	629	A perturbation/finite strip approach for static analysis of non-prismatic plate assemblies
H. H. Vaziri and **J. Xie**	639	A methodology for computing the response of non-uniform piles to vertical vibrations
V. Mermertaş and **H. T. Belek**	651	Dynamic stability of radially stiffened annular plates
T. Kant and **S. R. Marur**	659	A comparative study of C^0 and C^1 elements for linear and nonlinear transient dynamics of building frames
R. Srinivasan, H. M. Karandikar and **F. Mistree**	679	Understanding design–manufacture interaction using compromise decision support problems—I. A formulation for composite pressure vessels
R. Srinivasan, H. M. Karandikar and **F. Mistree**	693	Understanding design–manufacture interaction using compromise decision support problems—II. Preliminary synthesis of composite pressure vessels
R. Srinivasan, H. M. Karandikar and **F. Mistree**	705	Understanding design–manufacture interaction using compromise decision support problems—III. Design for manufacture of composite pressure vessels

Ten-Lu Hsiao	719	A global–local finite element for general composite structure
G. S. Ray and **B. K. Sinha**	731	Computation of centrifugal stresses in a radial-flow impeller
Lien-Wen Chen and **Der-Ming Ku**	741	Finite element analysis of natural whirl speeds of rotating shafts
Qin Qing-Hua and **Jin Fu-Sheng**	749	Variational principles and hybrid element on a sandwich plate of Lrusakov–Du's type
R. C. Kar and **T. Sujata**	753	Dynamic stability of a rotating beam with various boundary conditions
K. Y. Sze and **C. L. Chow**	775	A mixed formulation of a four-node Mindlin shell/plate with interpolated covariant transverse shear strains
Chang Koon Choi and **Seung Woon Yoo**	785	Geometrically nonlinear behavior of an improved degenerated shell element
M. Pourazady and **M. Radhakrishnan**	795	Optimization of a triangular mesh
	I	Software Survey Section

NUMBER 4

N. Ganesan and **T. C. Ramesh**	805	Stress analysis of composite railroad wheels
K. Bhaskar and **T. K. Varadan**	815	A higher-order theory for bending analysis of laminated shells of revolution
S. Kodiyalam, G. N. Vanderplaats and **H. Miura**	821	Structural shape optimization with MSC/NASTRAN
M. Eisenberger	831	Stiffness matrices for non-prismatic members including transverse shear
Woo-Sun Park, Chung-Bang Yun and **Chong-Kun Pyun**	837	Infinite elements for evaluation of hydrodynamic forces on offshore structures
P. Srinivasa Rao, P. K. Aravindan and **K. Ramanjaneyulu**	849	Buckling analysis of cooling tower shells subjected to non-axisymmetric wind pressures
Jeng-Shian Chang and **Yuh-Pao Huang**	857	Nonlinear analysis of composite antisymmetric angle-ply under uniform temperature field
A. Y. T. Leung	871	An unconstrained third-order plate theory

C. A. Hall, W. C. Rheinboldt and **M. L. Wenner**	877	A DEM displacement–plastic strain formulation of punch stretching
J. T. Borggaard, J. H. Kane and **J. Turi**	885	Highly accurate evaluation of system matrices for curved boundary elements
A. Kaveh	893	Graphs and structures
A. N. Sherbourne and **M. D. Pandey**	903	Differential quadrature method in the buckling analysis of beams and composite plates
A. Ranjbaran	915	A standard routine for rotation of a point about an axis in 3-D space
A. Ranjbaran	925	Embedding of reinforcements in reinforced concrete elements implemented in DENA
A. Służalec and **A. Kysiak**	931	An analysis of weld geometry in creep of welded tubes undergoing internal pressure
S. K. Ider	939	Finite-element based recursive formulation for real time dynamic simulation of flexible multibody systems
J. S. Davidson and **C. H. Yoo**	947	Effect of vertical support on highway bridge superstructures
K. S. Surana and **S. H. Nguyen**	957	Completely hierarchical two-dimensional curved beam element for dynamics
K. Biswas	969	Analysis of stress intensity factor for normal crack approaching weldbead on simplified compact tension specimen
D. A. Trowbridge, J. E. Grady and **R. A. Aiello**	977	Low velocity impact analysis with NASTRAN
S. N. Al-Rasby	985	Solution techniques in nonlinear structural analysis
J. P. Dwivedi, V. P. Singh and **P. C. Upadhyay**	995	Response of an imperfectly bonded buried fluid-filled orthotropic cylindrical shell due to an incident shear wave
A. V. Avdelas	1003	Determination of the collapse load of plastic structures by the use of an upper bounding algorithm
K. S. Sai Ram and **P. K. Sinha**	1009	Hygrothermal effects on the bending characteristics of laminated composite plates
S. Cetinkunt and **Wen-Lung Yu**	1017	Modified LQG/LTR-based controller design for distributed parameter motion control systems
J. D. Whitcomb	1027	Iterative global/local finite element analysis
M. Zeggane and **S. Sridharan**	1033	Stability analysis of long laminate composite plates using Reissner–Mindlin 'infinite' strips

J. P. Moitinho de Almeida and J. A. Teixeira de Freitas 1043 Alternative approach to the formulation of hybrid equilibrium finite elements

W. J. Slagter 1049 Flexibility parameters for a monolithic plate with an eccentrically loaded pin

M. N. Bismarck-Nasr 1059 On the sixteen degree of freedom rectangular plate element

K. Kanaka Raju and G. Venkateswara Rao 1061 Postbuckling of point supported square plates resting on elastic foundation subjected to thermal or mechanical loading

1065 Corrigendum
